ON KILLING THE HELPLESS.

THE SUGGESTION made by Dr. E. S. Wright before the Salt Lake County Medical association, that the world should sanction executions by physicians of persons who are incurably diseased, is not a new one, but a discussion of the question is always interesting. The case that drew out Dr. Wright's remark was a type of its kind. The patient was a woman of advanced years afflicted with a growth similar to goitre.

If it is not checked promptly-and there is no sure way of bringing this about-she will die a gradual, horrible death by suffocation. The woman can extract no enjoyment from life; every breath involves suffering, every motion excruciating pain. She herself would gladly welcome release, such a release as a fatal dose of morphine would give her. Should the physician be permitted to act as her kindly executioner?

True, there is one chance in a hundred thousand, perhaps, that an operation might relieve her. The uncertainty, though, is so great as to amount almost to certainty that she could not recover. She has lived now longer than the allotted span; she is ready, aye, anxious, for death. It is not cruel to permit her to live on and on in agony? We consider the police officer a humane man when he ends the sufferings of a crippled, sick or helpless beast. Should human beings be treated less humanely?

And there the affirmative argument, if it can be called argument, must end. No man can look into the future for one moment. No physician can say with absolute certainty, "This man or this woman, this boy or this girl, will surely die." True, physicians do pronounce the sentence of death in many, many cases, and, in the very large majority of such cases the physician speaks truly. But sometimes he is mistaken

Do not all of us know instances where, after all hope had been abandoned, the patient recovered? Have we not seen doctors, nurses, friends, leave the bedside to prepare for a funeral that most of them will not live long enough to attend? Does not the rejected applicant for life insurance frequently outlive the doctor who pronounced his doom? Therefore, no man can say and know, "There is no

They think so and they are willing, or they think they are willing, ! the moment for the action arrives, the supreme moment, most of them would falter. Once, in a southern state a physician was called to attend and treat the injuries of a man who had been crushed in a mine. The unfortunate's suffering, was so great as to make the blood run cold with horror. It was apparent that he could not recover. He knew it, and he begged the physician to administer a drug that would insure him easy exit from life. The doctor, moved beyond the power of words to express, consented. The patient died as peacefully as a tired.

It is almost impossible for the clerk to save anything from his salary and he has nothing to look forward to in old age except the charity of his friends or of the public. The prospect is a gloomy one. It may be said that laboring men and other workers for small wages have no better prospect, but the cases are not parallel. GEORGE M. SCOTT.

THE ANNOUNCEMENT that George M. Scott is to make his home hereafter in San Francisco will be re ceived with genuine regret by every one here who knows the man and his services to this city. In a long and active career, both as a business man and citizen, he has been invaluable to the community, and in all the walks hitter and political feeling ran high, his unfailing courtesy, his unselfish ness, his willingness to serve the publie at the sacrifice of his own welfare made him an example of good citizen-

This significant line was found in a letter written by one of the New York "get-rich-quick" swindlers to a fellow blackleg and it tells a great deal in a very few words. So long as the news papers paid no attention to them, these bandits felt perfectly safe. They plundered the unsuspecting public at their own sweet will, their operations being limited only by the purses of their vic-

That's why the crooks hate the newspapers. Take the man who wants to keep his saloon open on Sunday in violation of the law or the man who is a professional gambler. Those people don't like the newspapers, either, unless the newspapers are silent about their offenses. The surest way to stop public gambling and Sunday whisky selling is to publish the fact that the evils are permitted to flourish. The moral is obvious.

RAILWAY MAIL CLERKS.

THE STORY in yesterday's papers of the wreck on the Big Four railroad in which four railway mail clerks were burned to death, calls attention again to that branch of the government service. Of all the employes of the nation, the men who take the greatest risks and who draw the poorest salaries, in proportion to their risks and responsibilities, are the railway mail clerks.

There is hardly a railway accident of any magnitude that the list of killed or badly injured is not headed with the name of a mail clerk. Boxed into a narrow car, with the doors and windows locked, they have absolutely no chance to escape when disaster overtakes their train. Other employes have at least a little warning; they see the danger in time to jump or to brace themselves for the inevitable shock. It is not so with the mail

Their car is usually immediately behind the engine, where the first impact of the collision occurs. Nor are the cars as well constructed as the sleepers and passenger coaches. Heavy engines crash through them as though they were made of pasteboard and the wonder is, not that so many railway mail clerks are killed, but that so many escape death or serious injury. And their pay is, in many instances.

And their pay is, in many instances, less than the sum drawn by favored janitors of public buildings. No provision is made for pensioning those who are disabled in the service or for the care of their dependent families when the bread-winner is killed while. when the bread-winner is killed while performing his duty. The average criminal doesn't fear the police very much. He does fear the newspapers of the United States crime would flourish unchecked and criminals would enjoy never-ending seasons of prosperity. The newspapers do more every day to protect the public against the "get-rich-quick" fellows against the police very much. He does fear the next six weeks. > A delightful affair was the luncheon given yesterday at the Commercial club by Mrs. Robert G. Smith. The affair was in honor of Mrs. McGillycuddy of Omaha, who is spending some time at the Kenyon. The long table was spread in the private dining room at the club and was decorated artistically in violets. The lovely spring flowers were massed as a center dec-oration, and individual knots were at each place. Handsome candelabra were at either end of the board, and ferns and smilax added to the artistic effect. SPRY'S LIQUOR BILL.

To The Salt Lake Herald:

In your issue of Sunday you refer editorially to house bill 126, by Mr. Spry, the "liquor bill," as "an unenforceable law."
The provisions of the law, you believe, cannot be enforced. For your information and the information of your readers I will say that the law has been in force in the state of Nebraska for more than twenty years. It has worked very satisfactorily in that state and it is generally obeyed (with the exception of the antitreat section, and I don't know that there ever was any attempt to enforce that). There are a number of "dives" in Salt Lake City and Ogden that could not exist, I will admit, and it is the purpose of this bill to drive such out of business. The salconman who honestly tries to obey the law and run a respectable place need have no fears from the proposed law. It is that class of salconmen whose aim is to pour the vile stuff into a man as long as his money holds out, no matter what his condition may be, that must look out. By reference to the news columns of your paper you frequently read of someone being drugged and robbed in the salcons. This bill will do away with that business. The penalty for violations is what brings respect for law, and while the laws on our statute books touching the liquor question read well, the penalties provided are insufficient to deter men from violating them.

Then, again, you will agree with me. I think, that very few acquire the liquor habit after having attained the age of 21 years. The penalties provided by this measure make it very unsafe to furnish a minor a drink.

I think The Heraid will readily see the good points in the measure, and from your article I judge your only opposition rests upon the inability of the people of To The Salt Lake Herald:

I believe that it would be enforced in Utah and I know that its enforcement would largely curtail the evils that flow from the traffic as it is conducted today. I trust the legislators will give this bill due consideration. this bill due consideration to the e that relief may be had from the burde imposed upon the families of Utah fro the liquor traffic.
